BREXCEL JOE M. ORIAS

Junior Software Engineer

Antipolo, Rizal, Philippines | +63 915 463 4639 | brexcel14@gmail.com
GitHub: github.com/brixcel | Portfolio: brexcel.vercel.app

PROFESSIONAL SUMMARY

Computer Engineering student graduating in May 2027 and Software Engineering Intern at Egoist Labs. Builds full-stack web applications with React, TypeScript, Node.js and PostgreSQL, and sets up CI/CD pipelines with GitHub Actions and Cloudflare Pages. Seeking a Junior Software Engineer role.

WORK EXPERIENCE

Software Engineering Intern
Egoist Labs | September 2026 - Present

- Replaced manual production deployments that took 15-30 minutes with automated GitHub Actions pipelines that deploy in 3-5 minutes, used by a team of 5+ engineers across about 20 deployments to date.
- Wrote the deployment workflow for the Learning Platform frontend, running format checks, linting, type checking and tests before every deployment to Cloudflare Pages with Wrangler.
- Reworked the Capability Studio deployment workflow into separate production, development and feature environments.
- Configured both pipelines to deploy main to production and dev to a development site, with a preview URL for every pull request.
- Added concurrency controls so outdated workflow runs are cancelled automatically.

PROJECTS

Synctask | Full-Stack Developer
synctask-proj.vercel.app | React, Vite, Node.js, Express, PostgreSQL, Prisma, Docker

- Built a task management platform where users create tasks from natural-language prompts using AI.
- Implemented board, list, calendar and analytics views, a command palette, notifications and subtasks.

UrsacHub Social | Lead Developer
Laravel, PHP, Firebase, JavaScript, Tailwind CSS

- Led a team of 5 developers and authored about 70% of the commits, owning the architecture and full-stack development of a campus social networking platform with a news feed, posts, likes, comments, organization pages and role-based authentication.
- Built real-time chat between students.

DSA Workbench | Lead Developer
ursacdsa.vercel.app | JavaScript, HTML, CSS

- Developed an interactive visualization tool for University of Rizal System Antipolo Campus covering 8 data structures, including stacks, queues, linked lists and AVL trees, with step-by-step memory and pointer views.
- Used as a teaching aid in a Data Structures class of about 40 students.

UrsacHub | Front-End Developer
ursachub.onrender.com | Laravel, PHP, MySQL, Bootstrap, Tailwind CSS

- Built the entire front end of a campus web platform with a merchandise shop, news and events, and a student organization directory as 1 of 4 developers; the platform launched with real users.

Photo Booth | Solo Developer
simple-photobooth.vercel.app | React, Vite, Tailwind CSS

- Built a browser photo booth with countdown camera capture, 3, 4 and 6-photo layouts, stickers and high-res downloads.

EDUCATION

Bachelor of Science in Computer Engineering
University of Rizal System - Antipolo Campus | Expected Graduation: May 2027

SKILLS

Languages: TypeScript, JavaScript, PHP, SQL, HTML, CSS
Frontend: React, Next.js, Vite, Tailwind CSS, Bootstrap
Backend and Databases: Node.js, Express, Laravel, PostgreSQL, MySQL, Prisma, Firebase
DevOps and Tools: GitHub Actions, CI/CD, Cloudflare Pages, Wrangler, Docker, Git, GitHub, pnpm
